

Specification TEW105-Cable
Dated 17th May 2001

Internal Panel Wire Specification

(Standard TEW-105 Cable)

Internal panel wiring specification for Diesel Engine and Electric Motor Fire water Pump Controllers.

Construction:

Flexible bare-stranded copper conductor
Polyvinyl chloride insulation especially formulated to exceed the performance requirements of all applicable specifications.

Flexible PVC insulated cables comply with BS 6231, PVC insulated cable for switchgear and control wiring, and Flame retardant to BS4066 Part 1 and VW-1.

Cables conform to UL subject 758 appliance wiring material and CSA Standard C22.2 No. 127, thermoplastic-insulated equipment wire type TEW.
